I created my own html structure to answer the following questions.

HTML Structure:

```
<div id="v1">
  <p id="first">
    <span>Hello</span> <!-- firstChild -->
  </p>
  <button id="button">Click Me!</button>
  <div>Another Element</div>
</div>
```

DOM TREE

Saint Louis University

AND INFORMATION STUDIES
Information Technology and Computer Science Department

What will be returned by the following?

- **v1.nextElementSibling.firstChild**
Return: null (or error)
- **v1.childElementCount**
Return: 3
- **document.getElementById("button").nextElementSibling**
Return: <div>
- **document.getElementById("first").firstChild**
Return:
- **document.getElementById("first").firstElementChild**
Return: Hello
- **p.parentNode.firstElementChild.nextElementSibling.innerText**
Return: "Click Me!"
